Investigational Treatments: Overview

Introduction

New treatments are focused on the biologic abnormalities of lung cancer. Since lung cancer is a very serious disease, new treatments are desperately needed. Scientists are working to understand how lung cancer develops in the hope that better treatments will be discovered. Many clinical trials involving new ways of treating lung cancer are now in progress.

Lung Cancer Questions - Step 2 Please answer these questions to complete your search

How many prior chemotherapy regimens or combinations have you received for your lung cancer? ← 502

What is a chemotherapy regimen?

Which of the following chemotherapy agents have you received?

- ☐ carboplatin (Paraplatin)
- ☐ cisplatin (Platinol)
- ☐ paclitaxel (Taxol)
- ☐ docetaxel (Taxotere)
- ☐ gemcitabine (Gemzar)
- ☐ vinorelbine (Navelbine)
- ☐ none
- ☒ I do not know
- ☐ irinotecan (Camptosar)

} 504

What type(s) of prior therapy have you had for lung cancer? (Select all that apply)

- ☐ Surgery - to remove all or part of a lung (includes segmental or wedge resection, lobectomy, pneumonectomy)
- ☐ Surgery - to remove metastasis from brain

Dalteparin in Treating Patients With Advanced Breast, Lung, Colorectal, or Prostate Cancer
Sponsored by National Cancer Institute (NCI)

Location
Pennsylvania, United States ← 902

Purpose
RATIONALE Dalteparin may be effective in inhibiting the growth of blood vessels in tumors, decreasing the risk of metastatic cancer, preventing the formation of blood clots, and improving quality of life in treating patients with advanced cancer that has not responded to previous treatment PURPOSE Randomized double blind phase III trial to compare the effectiveness of dalteparin with no further therapy in treating patients who have advanced breast, lung, colorectal, or prostate cancer that has not responded to previous chemotherapy or hormone therapy. ← 904

Description
OBJECTIVES I Compare the effect of low molecular weight heparin (dalteparin) plus standard therapy versus standard therapy alone on the overall survival rate of patients with advanced cancers II Compare the toxic effects of these regimens and the effect on the quality of life of these patients III. Assess the incidence of symptomatic thrombotic events such as deep venous thrombosis (DVT), pulmonary embolus (PE), and clotted catheters in these patients & PROTOCOL OUTLINE This is a randomized study Patients are stratified according to prognostic index (good vs bad vs unsure), current therapy ← 908
